Art Unit: 3641

1. Claims 11-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 11, line 13, the phrase “which s extend” should be claimed as [which extend].

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3, 7, and 11-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Miller Jr..

Miller Jr. disclose a device comprising:

- | | |
|---|------------------------|
| a) a central portion in the form of a rectangular solid; | 35, 36, 32 |
| b) top, bottom, right, left, front, and rear surfaces; | see figs. 11, 12 |
| c) a right wing portion; | one side of 35, 32 |
| d) at least one threaded hole; | contains 58 |
| e) a left wing portion; | other side of 35, 32 |
| f) another at least one threaded hole; | contains another 58 |
| g) first and second scope mount receiving holes; | [52, 53] or [52', 53'] |
| h) pins of a scope mount; | 55 or 55' |
| i) a roll pin hole disposed through the left and right sides; | 44 |
| j) a threaded elevation adjustment bore; | 33 |

k) a threaded hole in the top surface;	other 33
l) set screws;	58, 58, 48
m) a rear sight mount; and	37
n) a fastener.	48

4. Applicant's arguments are addressed as follows. It is argued that Miller Jr. is not anticipatory because the claim limitation directed to "extending below said bottom surface of said central portion" is not met. In response, note that the central portion has different bottom surfaces at different levels. One of the bottom surfaces is directly below item 36 or 36' (see figs. 7 and 12). This bottom surface of the central portion is clearly higher than the bottoms of left and right wing portions 35, 32.

5. Claims 4-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. Applicant's arguments filed on 8/22/2005 have been fully considered but they are not persuasive. These arguments have been addressed in the preceding paragraphs of this Office action.

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period

Art Unit: 3641

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
